PROFILE

Reliable, qualified, and experienced graphic designer working mainly in the IT industry, particularly in software houses. Excellence in creativity, problem-solving, time-management, and technical skills. Offering industrial exposure and providing design solutions for a broad range of webmasters and app developers. Works well with the team of graphic designers, and highly participative in business meetings.

EXPERIENCE

Graphic Designer   (2013 - 2015)

I Led a team that focused on providing designs to e-commerce websites. Completed most orders in a 6-month period and won the perfect designer award.

Web Designer   (2018 - Now)

I worked on testing and improving their websites' designs. Worked with different content management systems and prepared plans for website structure and design.

English Teacher   (2016 - 2018)

I thought English for nearly two year in Watan All Around Course, and also thought some programming languages like python and java.

EDUCATION

Information Technology   (2018 - 2020)

I have an Associates degree in Information Technology that I studied in Afghan Institute of Technology(AIT).

Bachelors in Computer Science   (2017 - 2021)

I have a bachelor of Computer Science from kabul University. and I have participated in many web projects. with full confidence I can say that I have full hands on building web pages.
